

# ALLIED GROUP

of Industries

Manufacturer and Exporter of Dental & Surgical Instruments.

## DENTAL INSTRUMENTS CATALOGUE

**Allied Group of Industries** is a leading manufacturer and exporter of all kinds of single use and reusable Surgical & Dental instruments to worldwide. Our manufacturing unit is located at Sialkot (Pakistan), a world's renowned city for the manufacturing of Surgical & Dental Instruments. This is our family business, so we have worked hard to build our reputation in this evolving industry and our satisfied customers are our strength.

Our products are manufactured by using the best quality stainless steel as **AISI, ASTM** and **DIN** standard's recommended which is imported from **Germany, Japan** and **France**. All of the Surgical & Dental Instruments supplied by us are **ISO 9001:2015, ISO 13485:2012** and **CE** marked certified in accordance with the Medical Devices Directive. The key to our success is our quality assurance. We use the right material for the right products. We are also **OEM (Original Equipment Manufacturer)** and provide customise packaging to our customers.

We have vast range of different instruments available in our stock ready to be shipped for fast delivery to our valuable customers. By using the traditional craftsmanship and latest precision technologies, we are able to manufacture the instruments that are compatible and compete with the highest standards and quality of international markets. **Allied Group of Industries** is strongly determined to provide a dedicated service to customers that is built on foundations of quality and cost effectiveness.

**Allied Group of Industries** prices are very competitive and very flexible with customers provide maximum co-operation. Our company's motto is to keep customers satisfy because your satisfaction is our business.

### Our Mission At Allied Group of Industries

1. To provide our customers with outstanding customer support and provide premium quality Surgical & Dental instruments at the best and competitive prices.
2. To provide our customers with friendly support, easy-to-use ordering system.
3. To provide our customers with the latest products available.

### Our Policy At Allied Group of Industries

1. To be the market leader in supplying the best and premium quality Surgical & Dental instruments at highly competitive and affordable prices.
2. Fully understand the requirements of our respected customers and satisfy them.
3. Strongly follow the policy "**Customer First**" and "**Quality First**"
4. To continuously develop our technical expertise on the basis of technology, customer's feedback and quality workforce

5. To form strategic joint ventures and distribution networks within the industry around the globe and to fulfill our social, ethical and industrial obligations in the most effective and efficient manner.

#### **Our Strategy At Allied Group of Industries**

- 1) It is our utmost priority to serve our valuable customers with fair dealing, honesty, sincerity, truth, trustworthy relationship and cooperation.
- 2) We always cordially welcome our valuable customer's opinions, suggestions and recommendations.
- 3) We give replacement against defective goods, if the malfunction occurred at our end.
- 4) The stainless steel used in the production of purchase order is exactly the same as per approved samples.
- 5) Normally for cutting instruments like Scissors, Knives etc. we use (AISI 420 Grade) premium quality stainless steel.
- 6) For non-cutting instruments like Forceps, Tweezers, Impression Trays etc. we use (AISI 410 & AISI 304 Grade) premium quality Stainless Steel.
- 7) Moreover, we can use also the material as per our customer's requirements and demand.

If you would like to get our price list, interested to see our samples for quality assessment, would like to be our distributor or want to get more information about our premium quality instruments, please feel free to contact us for any information.

Thank you very much for your precious time and looking forward to get business from you.

**Best Regards**

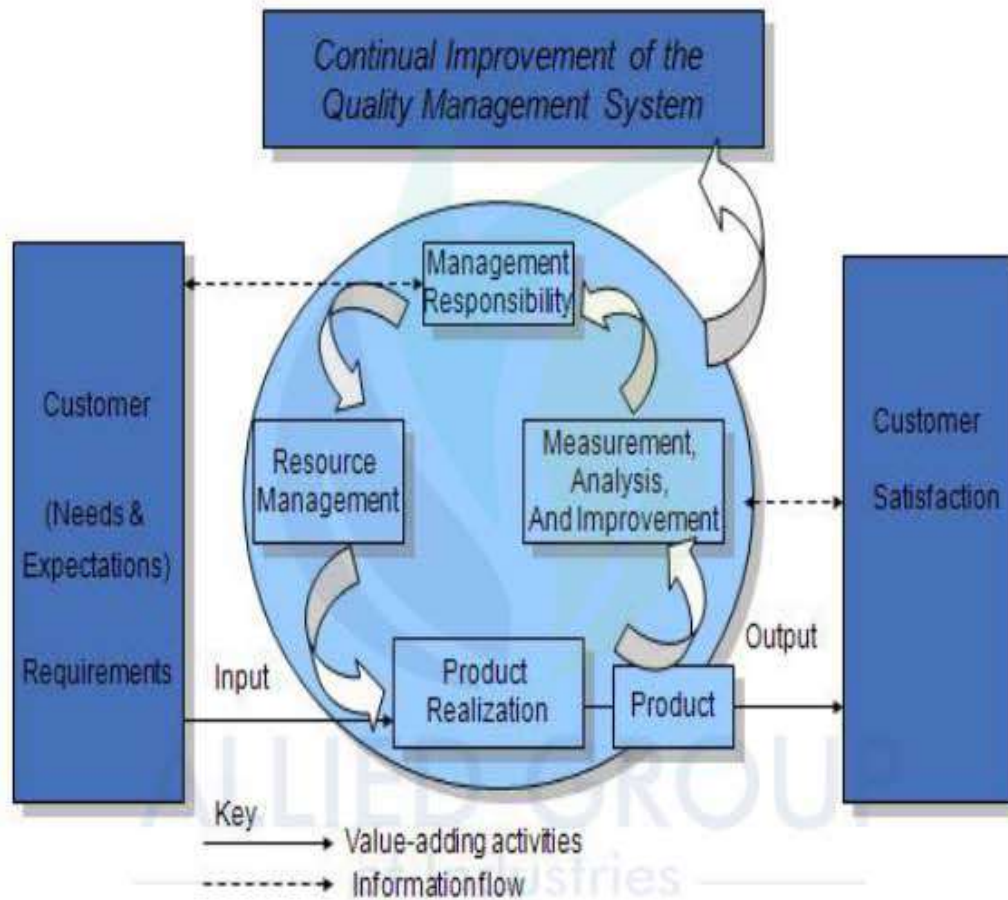

**Director**

**Allied Group of Industries**

ALLIED GROUP  
of Industries

## Quality Management System

The quality policy is the main guiding principles that provide the focus of quality to the whole organization and improve the effectiveness of the quality management system.

**Quality Begins With People Who Care**

## PROCESS FLOW CHART

## Manufacturing Capabilities Of Allied Group of Industries

All of our production departments are well equipped with the latest machinery which is imported from **Germany** and **England** and are well-staffed with the expert technicians.

### Raw Material Department

**Allied Group of Industries** always purchases best quality stainless steel raw material from steel suppliers or import directly from **Japan, France** and **Germany** when need to do. Different grades of stainless steel for example (**303, 304, 410, 420 & 440**) are used in the production of our Surgical & Dental Instruments.

At Allied Group of Industries, we believe that quality can only be achieved through quality raw material. As such, the best quality raw-materials (Stainless Steel Strips, Round Bars, Stainless Steel Coils and Stainless Steel Tubes) are purchased and are subjected to composition and hardness testing through our in-house laboratory in order to ensure that only the best materials are passed on to production departments.

### ASTM Standards

**Allied Group of Industries** fully follows and complies with the international **ASTM Standards** during the manufacturing of instruments. Below mentioned are the references and lists of the standards that we follow:-

- 1) **Allied Group of Industries** acquires premium quality stainless steel for the manufacturing of Surgical & Dental Instruments as per **ASTM Standard F899-95** and **ISO 7153**.
- 2) Descaling and cleaning of stainless steel in conformity to **ASTM Standard A380-99**.
- 3) Passivation of Surgical & Dental Instruments in conformity to **ASTM Standard B967-05**.
- 4) Corrosion of Surgical & Dental Instruments in conformity to **ASTM Standard F1089-02**.
- 5) Electro-polishing of Surgical & Dental Instruments in conformity to **ASTM Standard B912-02**.
- 6) As different instruments are manufactured with different grades of stainless steel. We mostly use the stainless steel type **AISI-303, AISI-304, AISI-410, AISI-420, and AISI 440** series with defined specifications as per customer's requirements. Therefore, in order to select the proper grade of stainless steel, various processes are followed according to the guidelines and conformity of **ASTM Standards**.

### **Forging Department**

**Allied Group of Industries** has its own forging section where forgings are made through Drop Hammer process by seasoned operators using dyes made of the best quality imported D-2 Steel. Forging is done by keeping in mind that the geometry of this process is a starting point and does not on any way limit your design freedom.

### **Milling Department**

Milling is used in the Surgical & Dental instruments industry, defined as the process of cutting, shaping and finishing of an instrument. It is the process that includes turning, welding and fringing. At **Allied Group of Industries** we use the best milling technology which involves cutting away pieces of metal to create dovetails, threads, bevels, slots and ridges.

### **Grinding: (Filing & Setting)**

In order to give a final shape to the instrument, our highly skilled craftsman use filing and grinding processes which removes the material from the instrument by abrasion. Then the instrument is keenly observed and set to perform perfect.

### **Hardness Test (Heat Treatment)**

For Surgical & Dental instruments, the term harness refers to the resistance to bending, scratching, abrasion or cutting. We have in-house Heat Treatment Department equipped with top quality Vacuum Furnace where qualified staff and engineers are engaged in treating the instruments in order to add strength to the steel and perfect the metallurgical composition for further processes. 50-55 hardness rating is applied to each instrument during the heat treatment process in order to increase the strength of instruments.

### **Polishing Department**

The Electro-polishing Department is manned by seasoned workmen using imported chemicals and best quality grinding wheels to ensure the best quality finish. In this department at **Allied Group of Industries**, the instruments are given final finish which includes mirror, satin or matt finishes. The finish is per customer's requirements.

### **Tungsten Carbide Department**

**Allied Group of Industries'** tungsten carbide department is installed with the best quality imported machinery being manned by the exceptionally well trained experts using the German Technology. We use German tungsten carbide tips for our instruments.

### **Coating Department**

Our coating department is capable of providing gold plated instruments as well as powder coated instruments depending upon the requirements of the instrument or the customer. Best quality coating related raw materials are used so that no compromise can be made on quality. Furthermore, each coating is inspected for quality before any instrument is passed on to the next department.

### **Passivation Department**

We use high quality imported chemicals in our Passivation Department. Every instrument is boil test and passivate for 24 hours before move to the next department. If need arises, the instruments are re-passivated so as to eliminate any chances of rusting or corrosion during the life of the instrument. Our instruments are rust-free for life though we give guarantee for five years.

### **Sandblasting Department**

For sandblasting of our instruments, we use the machines as well as the best quality sandblasting material, which are operated by skilled & well trained operators.

### **Stamping/Etching**

We use permanent and long life high quality laser etching which produces a wide variety of text and graphic images including our customer's logo with very detailed and fine image quality.

### **Quality Control Department**

Our quality control department is involved at all of the processes of manufacturing but before the instrument goes to the packing department, its quality and function is thoroughly checked by our qualified engineers.

### **Labeling and Packing**

Each instrument is initially packed in a poly bag to prevent scratches and then packed in the middle box. Middle boxes are then packed in the carton. The middle boxes are labeled which includes the article number, types and sizes of instruments. We can also arrange packaging and labeling according to the customers demand.

### **Warehouse/Stock Room**

After the instruments are packed and labeled, cartons are then move to our in-house warehouse where the complete record of shipments are maintained by our qualified warehouse management.

## Terms and Conditions Of Business

### Company's Agreement

Allied Group of Industries believes in the highest moral values and business ethics. Once a contract is made with a customer, we strongly aim at following it in its true spirit regarding the quality of product, packing, delivery time or any other particular need of the importer.

### Prices

Our prices are stable for one year, after which they may be subject to a change depending upon general price increase of stainless steel. Instruments prices are revised according to the price of raw material and craftsmanship at the end of company's financial year.

### Minimum Orders

We require a minimum order of US\$ 500.00 to process a delivery.

### Payment Terms

With new customers, we require an advance payment of 100% for first six months. However, credit terms can be arranged according to the importers requirement after 6 months.

### Freight & Shipping

Allied Group of Industries provides different methods of delivery as per customers demand:

- 1) By Air
- 2) By Sea
- 3) By Courier

Freight and shipping charges may be added to the invoice depending upon the nature of delivery unless otherwise stated by the importer. We deliver both C&F and FOB shipments.

### Returns Policy

A great deal of effort is made on packing your order with great care. Please inspect the instruments thoroughly for any loss or damage immediately upon delivery of products and file claim if products are found damaged. Concealed loss or damage must be reported within 5 days upon receipt.

### Returns and Technical Support

No returns are accepted without prior notices. Please contact our customer service team to obtain your invoice number. We reserve the right to examine returned goods before issuing credit. Returns must be made as soon as possible. Our technical team will carry out all repairs quickly and reliably.

## CARE, HANDLING AND STERILISATION OF INSTRUMENTS

### Allied Group of Industries Approved Sterilisation Methods

We recommend steam autoclave and ethylene oxide (ETO) sterilisation methods. Steam autoclave is highly efficient method of sterilisation which will not dull sharpness of instruments. If steam autoclave and ethylene oxide methods are not available, dry heat and chemical vapour methods are also recommended. We don't approve chemical sterilisation methods. These methods destroy instruments quickly and if used will eventually invalidate the warranty of your instruments.

### Sterilisation Advice

Instruments should be dry before sterilising and in the open position when sterilised. Instruments trays should never be overloaded. Sterilising units must be cleaned and functioning properly. Autoclaves have high levels of moisture can be damaging if not in good working order. Purified, distilled water must be used in autoclave sterilisation units. We don't recommend using tap water. It contains minerals which can cause corrosion and discolouration of instruments. Take out the instruments from the autoclave immediately after cooling when the sterilisation cycle is completed. Ensure that all tips and joints of the instruments are moisture free. Moisture may cause corrosion. Before storage, instruments should be properly lubricated with silicon based lubricant.

### Cleaning of Instruments

Always clean the instruments thoroughly in order to enhance the life span of your instruments. Bulk debris should be removed immediately after use. We recommend Enzymatic Cleaning solution in an ultrasonic cleaner to clean the instruments. Ultrasonic solution must be changed on daily basis. Instruments with hinge must be cleaned in an open position. Oxidation and discoloration may occur if instruments are not thoroughly cleaned. Always use disinfectants and detergents which are suitable for use with Surgical & Dental instruments. With regards to concentration and length of exposure, detergent manufacturer's instructions should be followed strictly. Tap water should be avoided during the cleaning of instruments. It contains minerals which can cause corrosion and discolouration of instruments. Tap water can also neutralise the rust inhibiting and lubricating solution.

We recommend the use of purified, distilled water in ultrasonic cleaning units. It is also recommended to use non-rinse ultrasonic solution that contains both lubricant and rust inhibitor prior to sterilisation and follow the manufacturer's exact solution measurement. Never leave the instruments in the ultrasonic solution after the cycle is finished. Instruments should be removed and dried immediately.

### Lubrication of Instruments

Instruments must be lubricated regularly to increase the life time of instruments. It should be carried out daily or at least on a weekly basis. Prior to sterilisation, instruments must be lubricated. Lubricants designed specifically for precision hinged instruments should be used. Make sure to use lubricant that is well-suited with the operating temperature of your dry heat unit if dry heat steriliser is being used.

### Sharpening of Instruments

Regular sharpening of instruments for example cutters will enhance their service life and increase their ability to cut more effectively and efficiently. **Allied Group of Industries** recommends frequency of sharpening the cutters depends on how frequently you use them and also the diameters and type of wires in which the cutter is being used frequently. Cutters must be assessed regularly if sharpening is required.

### Corrosion

All of the instruments manufactured by **Allied Group of Industries** are highly resistant to corrosion. Following care recommendations and maintenance tips can be followed to further prevent corrosion problems. Occasionally, discolouration of instruments may not be corrosion. Sometimes organic materials that are deposited on the instruments during use can give the appearance of corrosion or can be mistaken for rust.

- 1) An orange-brown stain is normally a phosphate layer caused by water sources, sterilisation solutions or cleaning detergents.
- 2) A black stain is normally an acidic reaction caused by detergents.
- 3) A dark brown stain is usually caused by dried blood residues.
- 4) A blue-black stain is usually plating caused by autoclave cleaning materials.

Corroded instruments should never be mixed with non-corroded instruments as it may multiply the process of oxidation. We strongly recommend discarding or replacing the corroded instruments immediately.

### Prevention of Corrosion

Corrosion can be an issue with any stainless steel instrument. Stainless steel requires oxygen to form a chromium oxide surface layer, which prevents it from corrosion. Bonding agents, organic residue and water droplets left on the instruments prevents oxygen to come in contact with the surface of the instrument and forming this protective layer.

### Allied Group of Industries Recommends The Following Steps To Prevent Corrosion

- 1) Prior to the sterilisation of instruments, all residual matter must be cleaned thoroughly.
- 2) Instruments must be sterilised in open position.
- 3) Instruments must be properly air or towel dried. Specifically take care of the joint areas and hinges.
- 4) Corroded instruments should never be sterilised with non-corroded instruments as it may permanently transfer the iron oxide on the corroded instruments to the non-corroded instruments.

### Allied Group of Industries Final Recommendations

- 1) All RE-USABLE instruments are delivered in NON-STERILE condition and must be cleaned, lubricated and sterilised before every use.
- 2) All instruments should be disinfected and cleaned immediately after use with disposable cloth/paper/ wipes etc.
- 3) If the instruments come into contact with blood, tissue, physiological saline or other foreign substances, they should be rinsed with warm (not hot) water before the substance dries up on the instruments.
- 4) We recommend cleaning solutions and rinse with pH7.0.
- 5) Ultrasonic cleaning is recommended.
- 6) For effectiveness, first clean any residue off the instruments before placing them in ultrasonic cleaner.
- 7) After cleaning, all instruments should be dried immediately.
- 8) Treat all instruments with oil which is considered as being physiologically safe (paraffin oil), especially their ends, ratchets, and moveable parts.
- 9) Instruments can be disinfected in Thermal Washer disinfectors.
- 10) For the disinfection and cleaning of Titanium and Aluminium Instruments, only use the substances that are particularly suggested for Titanium and Aluminium Instruments.
- 11) For instruments manufactured with autoclavable plastic, place them in the middle of chamber to avoid the overheating of plastic and not along the walls of chamber. We recommend to sterilise these instruments by putting them in "Self Sealing Sterilisation Pouches".
- 12) Do not leave instruments in cleaning or disinfecting solutions for a long time (over night or weekend) otherwise instruments can be damaged.
- 13) All instruments should be visually inspected for damage or breakage.
- 14) It is the user's responsibility to take proper care of the instruments.
- 15) We recommend laying down all instruments in their primary packaging.
- 16) Vacuum autoclave (steam) is performed at the temperature of 134 °C.
- 17) If instruments are dry heat (hot-air) sterilised, the temperature should be between 180 °C to 190 °C.

- 18) Corroded instruments should be discarded immediately.
- 19) The instructions of the autoclave manufacturer must be observed and followed always.
- 20) Instruments must be stored in dry, clean and humidity free environment without direct solar radiation.
- 21) Protect pointed tips of instruments with cloth, gauze or a special protection tube available from Allied Group of Industries.

### Maintenance of Instruments

Allied Surgical always recommend to follow proper handling, care and sterilisation methods in order to increase the life span of your instruments in order to make sure they perform the best that they can.

| Note: Always Use The Cleaning & Disinfection Solutions/Substances That Are Particularly Suggested For Specific Type & Category Of Instruments And Follow The Manufacturer Instructions. |            |                  |                               |                                 |                         |                        |                        |

#### Function:

Extraction forceps are used to further loosen teeth by rotational and tilting movements and finally to extract the teeth in combination with a fulcrum.

## Our Scalers

Compare our scalers and curettes with the best in the industry and you will immediately recognize we are equal in every way but one... price. Note the deep precision knurling for better tactile feel. The same high-grade stainless steel tips, the same light weight (under 18 grams) for less hand fatigue, the same professional craftsmanship, and surpassing the highest industry standards. of course, any manufacturer can make these claims, but we guarantee and certify ours.

- High-polish mirror finish tips.
- Manufactured within the guidelines of the FDA quality assurance system for good manufacturing practices.
- Highest grade German stainless steel, razor sharp, durable tips. Rockwell hardened to 60 RHc.
- 27 of the most popular designs from gracesys to McCalls to columbias, and many european patterns.
- All instruments are guaranteed against defects in material and workmanship.

- All instruments bear the ce mark, emblematic of the european community's highest standards.
- Customer satisfaction guarantee, too!
- Less than 20 grams ... Lightweight for less hand fatigue.
- Manufactured to the most exacting standards so the 50th instrument you buy is exactly like your first.
- You decide ... Why pay more for the same high-quality instruments?

## DIAGNOSTIC, PERIODONTAL & RESTORATIVE INSTRUMENTS

### VALUED BUYERS

Compare our scalers and curettes with the best in the industry and you will immediately recognize we are equal in every way but one... price. Note the deep precision knurling for better tactile feel. The same high-grade stainless steel tips, the same light weight (under 20 grams) for less hand fatigue, the same professional craftsmanship, and surpassing the highest industry standards. Of course, any manufacturer can make these claims, but we guarantee and certify ours. We regularly manufacturing below articles in showing handles & pattern A to L for better grip & perfection. We are also fully equipped & capable to develop these instruments as per your own specific requirements & demands in materials, sizes, shapes and patterns.

### BOX JOINT PLIERS

**AG5-1898 Adams Plier Round Box**  
Adams pliers for bending wire arches and bends right angles for wires up to .022", .025 tip to beak. Length 125mm

**AG5-1899 Falcon Beak Contouring Pliers.**

**AG5-1900**  
wires up to 0.020" / 0.7mm.

**AG5-1901 Johnson Contouring Pliers**

**AG5-1902 Aderer**  
Large wire bending and loop forming pliers

**AG5-1903 Tweed / angle rectangular arch forming & Torquing pliers**

**AG5-1904 Adams Plier**  
Adams pliers for bending wire arches and bends right angles for wires up to .022", .025 tip to beak. Length 125mm

**AG5-1905 Tweed Loop Formin Pliers**

**AG5-1906 Bird Beak Plier Standard**  
Bird Beak Wire bending plier without notches, which is suitable as a universal utility tool. Length 125mm

**AG5-1907 Mini Ligature cutters**

**AG5-1908 Small Fluch-cut distal and cutting Pliers**  
with safety hold fitted with un-breakable, corrosion resistant and durable stainless steel tips

**AG5-1909 Large Fluch-cut distal and cutting Pliers**  
with safety hold fitted with un-breakable, corrosion resistant and durable stainless steel tips

## PLIERS FOR ORTHODONTICS & PROSTHETICS

### L-KEY JOINT PLIERS

#### AG5-1922

Distal end cutter with safety hold, mini head, long handles. fitted with un-breakable, corrosion resistant and durable stainless steel tips

- 0.30 mm to 0.50 mm (.012" to .020")
- Max. 0.46 mm x 0.64 mm (.018" x .025")
- ⊗ 0.38 mm to 0.53 mm (.0155" to .0215")
- ⊠ Max. 0.53 mm x 0.64 mm (.021" x .025")

#### AG5-1923

Flush-cut distal end cutter with safety hold fitted with un-breakable, corrosion resistant and durable stainless steel tips

- 0.30 mm to 0.50 mm (.012" to .020")
- Max. 0.46 mm x 0.64 mm (.018" to .025")

#### AG5-1924

Soft wire and ligature cutter, Mini fitted with un-breakable, corrosion resistant and durable stainless steel tips

- ⌋ .25 mm to .38 mm (.010" to .015")

#### AG5-1925

Soft wire and ligature cutter, standard fitted with un-breakable, corrosion resistant and durable stainless steel tips

- ⌋ .25 mm to .38 mm (.010" to .015")

#### AG5-1926

Soft wire and ligature cutter, 15° angled fitted with un-breakable, corrosion resistant and durable stainless steel tips

- ⌋ .25 mm to .38 mm (.010" to .015")

#### AG5-1927

Soft wire and ligature cutter, 45° angled fitted with un-breakable, corrosion resistant and durable stainless steel tips

- ⌋ .25 mm to .38 mm (.010" to .015")

#### AG5-1928

Hard wire cutter, straight Fitted with un-breakable, corrosion resistant and durable stainless steel tips

- 0.30 mm to 0.50 mm (.012" to .020")
- Max. 0.56 mm x 0.71 mm (.022" x .028")

#### AG5-1929

Hard wire cutter, 15° angled Fitted with un-breakable, corrosion resistant and durable stainless steel tips

- 0.30 mm to 0.50 mm (.012" to .020")
- Max. 0.56 mm x 0.71 mm (.022" x .028")

#### AG5-1930

Hard wire cutter, 15° angled Non-autoclavable

- 0.30 mm to 0.50 mm (.012" to .020")
- Max. 0.56 mm x 0.71 mm (.022" x .028")

### L-KEY JOINT PLIERS

**AG5-1952**  
Aderer Clamp three jaw wire bending plier for contouring and bending wire up to .30"/.76mm.

**AG5-1958**  
Falcon beak contouring plier.

**AG5-1953**  
Bird beak plier for bending round, square and rectangle wire up to .30"/.76mm.

**AG5-1959**  
For placement and removal of arch wires, pins and other auxiliaries.

**AG5-1954**  
Bird beak plier for light wire bending round, square and rectangular up to .016"/0.41mm.

**AG5-1960**  
For placement and removal of arch wires, pins and other auxiliaries in angle design

**AG5-1955**  
Double Rounded jaw bending pliers, hooks and wire up to .020"/0.51mm.

**AG5-1961**  
contouring Plier.

**AG5-1962**  
Bending plier. In order to skirt molares bands. With grooved. Recommended wire. 016", 018" and 022" 0.41mm, 0.46mm and 0.56mm

**AG5-1956**  
Adams pliers for hooks and bending wire up to .030"/0.76mm.

**AG5-1963**  
Loop forming in four length 3,4,5 & 6 mm wire capacity 0.22", 56mm.

**AG5-1957**  
Johnson pliers for crown band contouring

**AG5-1964**  
Arch bending plier design for convenient handling of square or rectangular wire, .020" / 0.51mm.

### LAP & L-KEY JOINT PLIERS

**AG5-1965**  
In order to skirt bands and crowns.

**AG5-1966**  
Wires up to .020" / 0.7mm.

**AG5-1967**  
Round and concave plier for loop forming and banding wire up to .20" / .051mm.

**AG5-1968**  
Bending for round square or rectangular wire up to 0.30"/0.76mm

**AG5-1969**  
for double back and triple back bands in 0.30" / .76mm & 0.36" / .91mm lingual arch wires.

**AG5-1970**  
Detailing step plier double-sided offset beak permits bayonet bends. Creates right hand or left hand step-up or stepdown at 1/8, 3/8, or 1mm increments.

**AG5-1971**  
"V" bend stop special design makes 1mm "v" bends to shorten archwires or provide a positive stop. Excellent for placing stops in titanium wires. For round or rectangular wires up to .025"

**AG5-1972**  
Angle how plier efficient utility plier with serrated beaks for a firm grip. 45 angled tips to access hard to reach areas.

**AG5-1973**  
Weingardt plier serrated tips hold wires firmly at a convenient working angle. Tapered beaks fit easily between brackets and hard to reach areas. Our most popular utility plier.

**AG5-1974**  
Pin & Ligature Cutters TC.

#### COMPOSITE INSTRUMENTS USE:

A composite (tooth colored) filling is used to repair a tooth that is affected by decay, cracks, fractures, etc. The decayed or affected portion of the tooth will be removed and then filled with a composite filling.

There are many types of filling materials available, each with their own advantages and disadvantages. You and your dentist can discuss the best options for restoring your teeth. Composite fillings, along with silver amalgam fillings, are the most widely used today. Because composite fillings are tooth colored, they can be closely matched to the color of existing teeth, and are more aesthetically suited for use in front teeth or the more visible areas of the teeth.

As with most dental restorations, composite fillings are not permanent and may someday have to be replaced. They are very durable, and will last many years, giving you a long lasting, beautiful smile.

### Flexible Sinus-Lift Currettes – for an optimum sensitivity during the direct lift procedure

The perforation of the Schneiderian membrane is a complication that often occurs during a maxillary sinus floor augmentation procedure. The Sinus-Lift Instruments increase the sensitivity by blunt and flexible working tips with "Swing-Effect". Because of their special shapes and the characteristic of the stainless steel between the handle and the active part, light pressure is cushioned and gives the operator a direct and sensitive response. At the same time the risk to perforate the Schneiderian membrane is reduced to a minimum. Already at the development the focus was a practicable handling. Because of varying angulations and shapes of the active parts also in difficult areas they are easy to navigate also in difficult areas. The line of currettes consists of six different figures for every situation. They are complemented by spoon and condenser to place the bone graft.

The "Schneider's Membrane" of the sinus can be detached with curette by 1–2mm along the total cortical bone.

Curette is particularly useful in the lower part for detaching the membrane further. The same goes for the caudal area, especially when the membrane is 4–5 mm above the base of the maxillary sinus and the maxillary sinus is built up with granular material.

Curette makes it possible to lift the membrane further in mesial region. One working tip is especially designed for the right maxillary sinus and the other for the left maxillary sinus.

With curette the sinus membrane is further elevated in the upper and posterior part of the maxillary sinus wall.
